LAKE UNION

CSO Control Project

Issue No. 4,
November
1999

The clock is ticking...

Construction begins **Spring 2000**

King County Department of Natural Resources and the City of Seattle (Seattle Public Utilities) are building a joint project to control combined sewer overflows (CSOs) into Lake Union and Elliott Bay. CSOs are discharges of combined sanitary sewage and stormwater that are released into water bodies during periods of rainfall.

Construction of the entire project will last from 2000 to 2003. However, not all segments will be under construction simultaneously. The three general areas affected by construction are the Elliott West CSO Facility Site at 545 Elliott Avenue West, the outfall area and pathways in Myrtle Edwards and Elliott Bay Parks, and south Lake Union in the areas of Valley Street at Fairview to Roy, 8th Avenue North and Broad Streets, and Republican Street between 8th and 9th Avenues North.

Spring 2000

Pathways in Myrtle Edwards and Elliott Bay Parks will be modified to accommodate construction. Some sections will be rerouted.

Summer 2000

Excavation and tunnel construction begins on site at 545 Elliott Avenue West.

Fall 2000

Excavation begins at 8th Avenue North and Roy Street for the East Tunnel Portal of the Mercer Street Tunnel.
